

**John Barton, Ph.D., ABPP**, is the Training Director for the Doctoral Internship and Post-doctoral Residency. Dr. Barton graduated as 5 the Outstanding Graduate Student from Arizona State University. He has been a licensed psychologist for the more than 35 years. He is a diplomat of the American Board of Professional Psychology in Clinical Child and Adolescent Psychology. His practice focuses on the assessment of children and teens with ADHD and/or Learning Disorders and therapy for patients with medical and psychological problems. Dr. Barton is also the Director of the Clinical Psychology Center and Associate Clinical Professor at Arizona State University. He supervises ASU graduate students at the CPC and PCH in outpatient therapy and assessment. He also teaches courses in advanced psychological assessment as well as psychotherapy. He provides invited lectures on child and pediatric health issues to psychologists, physicians, educators, and the community at large.

**Brianne Butcher, Ph.D.**, is a pediatric neuropsychologist at the Barrow Neurological Institute at Phoenix Children's Hospital and serves as the primary supervisor of the Neuropsychology Track for the Clinical Psychology Doctoral Internship Program. Dr. Butcher earned a PhD at the University of Texas in Austin, Texas in 2009 where she completed specialty training in pediatric neuropsychology. She completed a doctoral internship at Miami Children's Hospital with a pediatric neuropsychology focus. Following internship, Dr. Butcher completed a two-year post-doctoral fellowship in pediatric neuropsychology at Children's Medical Center in Dallas, Texas. Dr. Butcher's current clinical focus is neuropsychological assessment of pediatric patients with acquired brain injuries and medical conditions that impact the central nervous system. Dr. Butcher is also an assistant professor in the clinician-scholar track at the Barrow Neurological Institute at Phoenix Children's Hospital and a clinical assistant professor in the Department of Child Health at the University of Arizona College of Medicine in Phoenix.

**Kristin Crocfer, Psy.D.**, is a pediatric neuropsychologist at Barrow Neurological Institute at Phoenix Children's Hospital and serves as the practicum coordinator for neuropsychology. Dr. Crocfer earned a Psy.D at Loma Linda University in California where she completed specialty training in pediatric neuropsychology. She completed a doctoral internship at the Kennedy Krieger Institute at Johns Hopkins University School of Medicine with a pediatric neuropsychology focus. Following internship, Dr. Crocfer completed a two-year post-doctoral fellowship in pediatric neuropsychology at Children's Health/Children's Medical Center in Dallas, Texas. Dr. Crocfer evaluates pediatric patients with medical conditions that impact the central nervous system with a current clinical focus on neuropsychological assessment of pediatric oncology patients. Dr. Crocfer holds faculty appointments at Barrow Neurological Institute at Phoenix Children's Hospital and the University of Arizona College of Medicine- Phoenix.

**Joel Hanania, Ph.D.**, has been a Licensed Psychologist in Arizona for over 25 years. After completing training as a School Psychologist, Dr. Hanania pursued his doctoral training in School Psychology at the University of North Carolina at Chapel Hill where he interned in pediatric psychology at the developmental disability diagnostic clinic at North Carolina Memorial Hospital. Dr. Hanania's career includes providing diagnostic and treatment services as part of a private practice, and as the clinical director for an agency that operated private therapeutic day schools for children and adolescents with severe behavioral and/or learning challenges. Dr. Hanania also has a long history of working for and with public school districts and has extensive knowledge of the educational needs of children with a wide variety of

developmental and mental health conditions. Dr. Hanania is presently in the Department of Developmental Behavioral Pediatrics and performs diagnostic evaluations for children suspected of being on the autism spectrum.

**Michael Lavoie, Ph.D.**, the Director of Neuropsychology Services, has been a licensed psychologist for 20 30 years and had completed two years of post-doctoral experience in Neuropsychology. He has been training students and conducting neuropsychological evaluations for the past 20 30 years. He has taught undergraduate and graduate courses in Brain Development, Brain and Behavior Relationships, Anatomy and Physiology, Human Physiology, and Clinical Neuropsychology at Assumption College and Clark University in Worcester, Massachusetts, and at Arizona State University. Dr. Lavoie has lectured at local and state conferences, and has presented at national conferences. He is a member of the Neuroscience Advisory Committee and the Psychology Training Committee at Phoenix Children's Hospital, is currently the Vice-Chair of the Governor's Council on Spinal and Head Injuries, is a member of the University of Arizona College of Medicine Phoenix Admission's Committee, and is a past president of the Arizona Neuropsychological Society.

**Zorash Montano, Ph.D.**, joined Barrow Neurological Institute at Phoenix Children's Hospital (PCH) as a staff psychologist as part of the Consultation and Liaison Psychology Service in March 2020. Dr. Montano earned her doctoral degree in Clinical Psychology from Arizona State University (ASU). She completed her internship in Pediatric Psychology at Boston Children's Hospital and her post-doctoral fellowship in Pediatric Psychology at Children's Hospital Los Angeles (CHLA). Before arriving in Phoenix, Dr. Montano was the psychologist in the Division of Urology at CHLA. Stemming from her training at ASU, Dr. Montano is particularly interested in parenting interventions and how these can be applied in the medical setting. Further, she is passionate about working with multidisciplinary teams in the care of patients and is excited to continue this work at PCH.

**Kimberly Painter, Psy.D.**, is a staff neuropsychologist who is responsible for the inpatient neuropsychology service at Phoenix Children's Hospital. Her primary role is as a member of the multidisciplinary team on the CARF accredited inpatient rehabilitation unit. Dr. Painter completed her pre-doctoral internship at Children's Hospital of Michigan and her APPCN Neuropsychology fellowship at St. Louis Children's Hospital/Washington University Medical School. She holds academic appointments at University of Arizona College of Medicine-Phoenix and Barrow Neurological Institute as an Assistant Professor, and is involved in clinical teaching of practicum students, interns, and medical residents.

**Mark Popenhagen, Psy.D.**, Since joining Phoenix Children's Hospital in early 2013, Dr. Popenhagen has been the head of mental health services for the Pain Medicine Program and is the Section Chief for Psychology with Medical Staff Services. He has 18 years of experience specializing in pediatric psychology, pain management, and palliative care. Dr. Popenhagen earned his PsyD from the Minnesota School of Professional Psychology in Egan, MN and completed a fellowship in pediatric psychology at St. Jude Children's Research Hospital in Memphis, TN. His clinical and research interests focus on the treatment of both acute and chronic pain conditions such as such as cancer, traumatic injury, headaches, fibromyalgia, complex regional pain syndrome, hyperalgesias, cystic fibrosis, and epidermolysis bullosa

(EB). He has authored/co-authored several papers, chapters, and posters on pain and pain management, serves on the Scientific Advisory Board of the Dystrophic Epidermolysis Bullosa Research Association of America (debra of America), is participating in the development of clinical practice guidelines for individuals living with EB through DEBRA International, and is a frequent invited national and international lecturer on the topics of pediatric pain management, coping with chronic illness, and epidermolysis bullosa.

**Emma Ross-Khatami, Ph.D.** Dr. Ross is a staff psychologist at Phoenix Children's Hospital who performs inpatient consultation and liaison services for the inpatient medical floors. She is also the dedicated psychologist on the palliative medicine team. Dr. Ross graduated from the University of Nevada Las Vegas doctoral program with specialty in Clinical Child and Adolescent Psychology and did both her internship and fellowship at Barrow Neurological Institute at Phoenix Children's Hospital. Dr. Ross was the recipient of the Arizona Psychological Association Resident of the Year award.

**Arie Zakaryan, Ph.D.,** is a psychologist with clinical specialization in Pediatric Psychology and Pain Management. He received his doctoral degree with a child clinical subspecialty from Loyola University Chicago in Chicago, IL. He went on to conduct his pediatric psychology internship at Rush University Medical Center in Chicago, IL. Dr. Zakaryan completed his fellowship in pediatric psychology at Children's Hospital of Orange County (CHOC) in their Co-Occurring Clinic with a focus on treating patients with co-occurring medical and mental health diagnoses, especially for youth diagnosed with cancer. He also is fluent in Spanish and Armenian and conducts assessment and intervention in Spanish. Dr. Zakaryan joined Phoenix Children's Hospital in 2017 and is a psychologist as part of the Pain Medicine Program. In addition, he has been working with our Pediatric Surgery department to develop a protocol for incorporating psychology prior to chest wall surgeries to improve pain coping as well then continue supporting patients/families while they are inpatient. Dr. Zakaryan, along with PCH Pain Medicine Physician Dr. Paola Genovese and PCH Physical Therapist Rachelle Cherryholmes, helps run the new Weekly Rehabilitation and Pain Program (WRAPP) for chronic pain adolescents in the Mercy-Gilbert clinic.
